

# Bringe die Tiere nach Hause!

The maze puzzle consists of a central area with four paths leading to different destinations. The paths are defined by different line styles: solid, dashed, and dotted. The destinations are represented by photographs of various environments. The animals are positioned at the start of each path, and their corresponding paths lead to their respective homes.

- The raccoon is connected to the forest tree photo by a dotted path.
- The dog is connected to the forest path photo by a dashed path.
- The crab is connected to the half-timbered house photo by a solid path.
- The parrot is connected to the tropical beach photo by a dotted path.
